Bonneville Power Administration

Watershed Management Program Early Action Projects

AGENCY: Bonneville Power Administration (BPA), Department of Energy (DOE).

ACTION: Floodplain statement of findings.

SUMMARY: This notice announces BPA's proposal to fund watershed rehabilitation projects to improve salmon habitat in floodplains located throughout the Columbia River Basin in the states of Washington, Oregon, and Idaho. In accordance with 10 CFR Part 1022, BPA has prepared this Floodplain Statement of Findings for the Watershed Management Program Early Action Projects. A Notice of Floodplain and Wetlands Involvement was published in the Federal Register on May 14, 1996 (Vol. 61, No. 94, pp. 24297-24298), and a floodplain and wetlands assessment was prepared by BPA describing the effects, alternatives, and measures designed to avoid or minimize potential harm to or within the affected floodplain. The assessment was prepared in conjunction with the Categorical Exclusion for this project.

FOR FURTHER INFORMATION CONTACT: Nancy Weintraub—ECN, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon, 97208-3621, phone number 503-230-5373, fax number 503-230-5699.

SUPPLEMENTARY INFORMATION: Potential floodplain effects would include placing new structures or materials in streams that could be dislodged in a flood; and disturbing existing streambanks and channels, which would make them more susceptible to erosion and failure during flooding until stabilized and revegetated.

The proposed actions would have long-term, net positive effects on the floodplains affected. It is necessary for many of the proposed actions to be located in floodplains because they are actions that would stabilize and rehabilitate streams and streambanks. Alternatives to the proposed actions are no action, or revisions in the proposed actions that would reduce potential net negative impacts to floodplains. The proposed actions would be required to conform to applicable Federal, State or local floodplain protection standards. The following steps will be taken to avoid or minimize potential harm to or within the affected floodplain: (1) the structures will either be engineered to withstand flooding, or would be natural materials designed to move downstream with the floods to create habitat for fish; and (2) channel restoration, revegetation, and erosion control and stabilization actions would be designed to lessen the impacts of future flooding on lives and property.

BPA will endeavor to allow 15 days of public review after publication of this statement of findings before implementing the proposed action.
